

Land and Asset Management (LandMan)

Maximize value from land and alternative assets.

Integrated business solutions

LandMan is one of CGI's integrated business solutions, designed to help energy businesses across North America with managing their upstream back office with greater cost efficiency, insight, and agility. Each of CGI's optimized business solution provides the advantages of:

Full integration

with other CGI solutions as well as flexible architecture to integrate with other applications.

Cloud based

infrastructure to minimize deployment and IT maintenance costs, plus speed up implementation.

Advanced cybersecurity

for data protection and business continuity.

LandMan efficiently tracks energy assets including mineral, contract, surface, JV and wells.

LandMan is a comprehensive land and asset management solution designed to manage energy assets and associated contracts including mineral, surface, and joint venture. It is a flexible solution that can be utilized for solar, wind, and electricity.

The most important foundation underlying the oil and gas industry is the land upon which energy resources are explored, discovered and produced. Management of land and associated assets can be the "make or break" factor in the success of an upstream company. Tracking ownership details and maximizing the use of land and other assets is critical, and technology plays an important role.

CGI's LandMan provides a seamless flow of critical data empowering teams to become more effective land administrators, and enabling your business to maximize its asset use and profit-generation.

Value of LandMan for land management teams:

- **Ownership detail insight to maximize investments**
Efficient and timely access to accurate land and asset information provides critical insight for better decisions to protect leases and maximize profitability.
- **Reduced errors and administration**
A seamless flow of verified data empowers land employees to proactively manage assets and increase operational efficiency

LandMan Release 21 Features

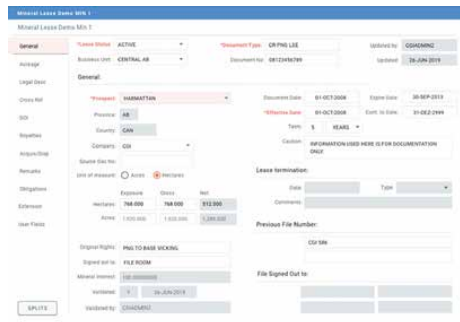

LandMan Release 21 includes the 2017 CALEP Property Transfer Procedure, together with the latest CAPLA Master Road Use Agreement template.

Solution capabilities

LandMan maximizes asset output by providing a flexible, comprehensive solution for oil and gas mineral and surface asset administration across North America.

- **Comprehensive system** provides complete visibility into ownership details drawing on a full set of legal survey systems and true structured rights, where related files are automatically linked. LandMan incorporates well management, mineral, surface, contract, and fee land rights and ownership plus access (road use and crossings), and JIFI (units, facilities and service) agreements.
- **One system to manage Canadian and US contracts and lands** allows administrators to efficiently generate invoices and accounting entries for multiple operating entities across North America.
- **Edit multiple files with one update** as related files are linked allowing edits in one place to propagate instantly without accessing individual files.
- **Unparalleled query, filtering and reporting capabilities.** Filters and reports are easy to save, reuse, share and export.

- **Continuous enhancements** ensure compliance and competitiveness, including support for the latest CALEP and PASC procedures.
- **Self-serve configuration** allows users to adjust settings to fine tune LandMan set-up for each unique project or business.
- **Scalability** allows users to stay with one system and expand usage as needs arise with available capabilities such as Access Agreement and Joint Venture. Other features include crown rental invoice reconciliation, Notice of Assignment document creation and interfacing with accounting and mapping applications.

About CGI

Insights you can act on

Founded in 1976, CGI is among the largest IT and business consulting services firms in the world.

We are insights-driven and outcomes-based to help accelerate returns on your investments. Across hundreds of locations worldwide, we provide comprehensive, scalable and sustainable IT and business consulting services that are informed globally and delivered locally.
